

# DIGITALISATION OF INFRASTRUCTURE PROJECTS

Tivoli hotel Copenhagen, February 28th, 2019

We all know how technology can optimize effectiveness, coordination and safety. Now we invite you to see how a joint venture between two technology companies can bring even greater value to your infrastructure projects.

Maybe you tried using the GIMMI from 2A Tech. Maybe you tried the suitcase-trackers from CPC Tracking. But have you ever experienced the benefit of combining the two?

We would like to invite you to spend half a day to learn more of the potential of digitizing your projects and by doing so gaining the benefits of:

Coordinate all activities - Minimize delays - Improve safety - Optimize dispositions of crew, machines and equipment – Real-time track of crew, machines and equipment – Minimize manual registration – Support safety regulations – Project transparency – Supervision - Cost savings

External speakers will share their experience and their view on the future trends with digitizing the infrastructure projects.

We wrap it up with some networking where you will have the chance to share your thoughts with international infrastructure owners and constructing companies.

## AGENDA

10:00 - 10:30	Arrival and coffee
10:30 - 11:00	Welcome by 2A Tech and CPC Tracking
